AN AUGMENTED REALITY APPLICATION

Selfie

Photo shoot with a virtual character

Inserting 3D items

to customize the selfie

Broadcasting of the photo

on the shopping mall screens

Sending by email

Creating

a prospect database

Content update tool

USE CASE

During Christmas time, your customers will enjoy a **selfie with Santa Claus**.

The capture photo can be customized by **adding accessories**.

The photo will be projected on the **shopping mall screens**.

Offer a **game**: the children have to search for their portraits on the shopping mall screens.

Your customers will bring home a souvenir photo that can be **posted on the social networks**.

I installed this application in the central place of the shopping mall. Both children and parents love it!

Rémi Dupont
Shopping Center Manager
